### 2.4 Transforming Graphs Investigation

1. Graph the function $f(x)=x^{2}$.

| X |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $f(x)$ |  |  |  |  |  |  |  |

2. Using your graphing calculator, graph the following parabolas and describe the transformations as compared to the standard graph of $f(x)=x^{2}$. In your comparison, make sure to include the changes in vertices, shape of the graph, and position on the coordinate plane.
a. $f(x)=x^{2}+4$ $\qquad$
b. $f(x)=x^{2}-4$ $\qquad$
c. $\quad f(x)=(x+4)^{2}$ $\qquad$
d. $f(x)=(x-4)^{2}$ $\qquad$
e. $f(x)=4 x^{2}$
f. $\quad f(x)=\frac{1}{4} x^{2}$
g. $f(x)=-x^{2}$
3. Predict the phase shifts that will occur for the graph of $f(x)=(x-3)^{2}+6$. Then, use the graphing calculator to check your prediction. $\qquad$
4. Graph the equation $f(x)=|x|$.

| x |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $f(x)$ |  |  |  |  |  |  |  |

5. Using your graphing calculator, graph the following functions and describe the transformations as compared to the standard graph of $f(x)=|x|$. In your comparison, make sure to include the changes in vertices, shape of the graph, and position on the coordinate plane.
a. $\quad f(x)=|x|+5$
b. $\quad f(x)=|x|-5$
c. $\quad f(x)=|x+5|$ $\qquad$
d. $f(x)=|x-5|$ $\qquad$
e. $f(x)=5|x|$ $\qquad$
f. $\quad f(x)=\frac{1}{5}|x|$
g. $f(x)=-|x|$
6. Predict the phase shifts that will occur for the graph of $f(x)=|x+4|-3$. Then, use the graphing calculator to check your prediction. $\qquad$
7. a. Graph $y=x^{2}$ and $y=-x^{2}$.
b. Graph $y=x^{3}+2 x^{2}$ and $y=-\left(x^{3}+2 x^{2}\right)$.
c. What do you notice? What can you generalize about the graphs of $y=f(x)$ and $y=-f(x)$ ?
8. a. Graph $y=2 x-1$ and $y=2(-x)-1$.
b. Graph $y=\sqrt{x}$ and $y=\sqrt{-x}$
c. What do you notice? What can you generalize about the graphs of $y=f(x)$ and $y=f(-x)$
9. Sketch a graph of each of the parent functions.
$\mathrm{f}(\mathrm{x})=\mathrm{c}$
$\mathrm{f}(\mathrm{x})=\mathrm{x}$
$\mathrm{f}(\mathrm{x})=|\mathrm{x}|$
$\mathrm{f}(\mathrm{x})=\sqrt{x} \quad \mathrm{f}(\mathrm{x})=\mathrm{x}^{2} \quad \mathrm{f}(\mathrm{x})=\mathrm{x}^{3}$
